MEET THE TEAM

The Penn College Baja SAE team has been placing among the nation's elite at the Baja SAE Collegiate Design competitions for a decade. Recording 15 top-10 finishes in the endurance race, including wins in 2022 at Baja SAE Tennessee Tech and Baja SAE Rochester beating teams from Michigan, Michigan State, Purdue, Cornell, Rochester Institute of Technology, Case Western Reserve, Georgia Tech, Virginia Tech, Clemson, Auburn, Texas A&M, and ETS Montreal.

2025 TEAM GOALS

Our team goals include updates to our suspension dynamics and braking system. During the two races in Williamsport and Michigan, our car performed well in the straights and corners but would lose speed over bumps and jumps. To remedy this, we have acquired a new shock dyno and plan to make custom length shocks. We are considering making our own brake calipers and master cylinders to cut down on weight and reduce the overall footprint of the caliper inside of the front wheel. We aim to greatly improve our endurance race placement by making these changes.

We are grateful for the alumni who built a solid foundation before us and the supporters who continue to empower us. We are able to do what we do because of the support received from individuals and sponsors. Explore sponsorship opportunities on the next page.
