

HOME ENERGY PROFESSIONAL: QUALITY CONTROL INSPECTOR

Earn one of the highest nationally recognized Home Energy Professional designations as a certified **Quality Control Inspector (QCI)**. Quality control inspectors are central to verifying compliance of home energy retrofit projects according to work plans, standards, and government regulations. Inspectors combine their extensive knowledge of building science, regulatory standards, and sharp attention to detail to ensure that every project is implemented according to plan.

WHAT YOU'LL LEARN

- ◇ Program regulations and standards
- ◇ The purpose of a quality control inspection
- ◇ Best practices for documentation and report writing
- ◇ Perform a thorough inspection of installed energy measures
- ◇ Value of in-progress inspections

EARN THE CREDENTIAL

The Clean Energy Center's HEP Quality Control Inspector course is designed to prepare learners to take the BPI Home Energy Professional Quality Control Inspector certification exam (priced separately). The Center is an approved Building Performance Institute (BPI) Test Center. The BPI Quality Control Inspector certification exam is proctored at either one of our locations in Williamsport or Latrobe, Pennsylvania.

A TRUSTED TRAINING PROVIDER

The Clean Energy Center's HEP Quality Control Inspector training program is accredited under Interstate Renewable Energy Council (IREC) Standard 01023:2019 and covers the knowledge, skills, and abilities contained in the National Renewable Energy Laboratory (NREL) Job Task Analysis for Quality Control Inspector.

ELIGIBILITY AND PREREQUISITES

PA Weatherization Assistance Program QCIs must complete the HEP Energy Auditor course before starting the HEP QCI course. For workers who have completed an IREC-Accredited HEP Energy Auditor training program in another state, BPI HEP Energy Auditor Certification will be accepted in lieu of completing HEP Energy Auditor training.

**COURSE DELIVERY:
SELF-PACED**

**COURSE LENGTH:
4 HOURS**

**COURSE FEE:
\$120**
